PROFESSIONAL SUMMARY

Motivated **Master of Data Science candidate** with a strong technical foundation in **Python, SQL, R, and RAG-based architectures**. Proven ability to build end-to-end AI and Data solutions, including automated data pipelines. Experienced in collaborating within cross-functional teams to deliver data-driven insights in Healthcare and Finance. A detail-oriented problem solver with exceptional communication skills, committed to writing clean, production-ready code.

TECHNICAL SKILLS

- **Languages:** Python (Pandas, Scikit-Learn, PySpark), SQL, R (Statistical Analysis), Dart.
- **AI & Machine Learning:** Retrieval-Augmented Generation (RAG), LLM Integration (Gemini), Supervised and Unsupervised Learning, Time-Series Forecasting, Vector Embeddings.
- **Data Engineering:** Microsoft Fabric, Medallion Architecture, Data Wrangling, ETL
- **Tools & Cloud:** GCP (Cloud Functions, Vertex AI), Firebase, Power BI (DAX), Git, Flutter
- **Professional Skills:** Stakeholder Engagement, Technical Storytelling, Agile/Scrum Delivery, Peer Code Review, High Attention to Detail.

EXPERIENCE

AI Team Lead | Gopher Industries (Guardian Monitor Project) | Melbourne *Jan 2025 – Dec 2025*

- **Technical Coordination:** Directed a cross-functional team of **11 developers**; managed technical delivery, performed **peer code reviews**, and facilitated sprint progress briefings with the **Product Owner**.
- **System Design:** Designed a **Unified Data Schema** for 3 sub-projects, standardizing health metrics and facilitating seamless data interoperability across the platform.
- **Synthetic Data Engineering:** Architected a privacy-compliant **data pipeline** using **Python and Ollama** to generate synthetic training sets; automated **data cleaning and wrangling** for high-fidelity model inputs.
- **Full-Stack Automation:** Built a script-based **API** for automated data export to **Google Sheets** and engineered a comprehensive **Analytics Dashboard** to visualize real-time patient risk trends and project **KPIs**.
- **Predictive Modeling:** Implemented a **Random Forest** classification model to predict patient stability, utilizing **Feature Importance** analysis to identify key health indicators for clinical focus.

Junior Software Developer | Radstec | California, USA *May 2024 – Aug 2024*

- **AI Implementation:** Deployed an end-to-end **RAG-powered chatbot** using **Gemini on GCP**, automating high-volume inquiries and optimizing information retrieval efficiency.
- **Data Orchestration:** Configured **Vertex AI Search** for automated web crawling to keep the LLM knowledge base synchronized with real-time site data.
- **Accuracy Optimization:** Enhanced model grounding in **GCP Vertex AI Platform** to eliminate hallucinations, ensuring production-grade reliability for customer-facing interactions.

Flutter Development Intern | CUROWEBS | Coimbatore, India *Jan 2024 – May 2024*

- **Mobile Product Launch:** Engineered **C-Meds**, achieving **300+ downloads** and **100+ active users** on the **Google Play Store**; utilized **Firebase OAuth** and **Cloud Firestore** for secure data persistence.
- **Serverless AI Pipeline:** Architected a **GCP Cloud Function** backend using **Gemini Vision** for **automated medical entity extraction**, reducing manual data entry by **90%** and triggering **automated medication reminders**.
- **Comprehensive Health Tracking:** Developed modular features to log and track vital health metrics, including **Blood Pressure (BP)**, **Heart Rate**, and **Glucose levels**, providing users with long-term **data visualizations** of health trends.

PROJECTS

Personal Portfolio AI (RAG Pipeline) | Python & Google Gemini

- Engineered a **RAG system** using **Gemini 2.5 Flash** to transform static portfolio data into a searchable knowledge base via dimensional vector embeddings.
- Implemented a **Flask-based REST API** to handle real-time context-aware queries with a 0.3 similarity threshold for high-precision retrieval.

HyperScale Retail Command Center | Microsoft Fabric & AI

- Designed a **Medallion Architecture** on Microsoft Fabric; Utilized **PySpark** and **Facebook Prophet** for 30-day demand forecasting and automated stockout alerts.
- Configured **Fabric Activator** to trigger alerts with **< 1-minute latency**, enabling immediate operational intervention and inventory optimization.

Bank Loan Performance Analysis | Power BI & SQL

- Created a Power BI dashboard to monitor a **\$435.8M loan portfolio**, utilizing **DAX** to analyze risk exposure and success rates (**86.2%**).
- Developed **MTD/MoM performance tracking** and visualized debt consolidation strategies to optimize financial portfolio health.

Liver Cirrhosis Survival Prediction | Python & Scikit-Learn

- Developed an **SVC multiclass classification model** predicting outcomes (Death, Transplant, No Transplant) with **85.5% accuracy** using clinical feature engineering.
- Applied **class weighting and cross-validation** to address data imbalance and identify key physiological markers linked to survival rates.

E-Cell SASTRA Mobile Platform | Flutter & Firebase

- Launched a networking platform reaching **1,000+ downloads** and **1,000+ registrations** with a **4.8-star rating** on the Google Play Store.
- Implemented modules for **business proposal tracking** and founder-consultant networking that reduced manual communication by **40%**.

Victoria Green Transit Strategy | GovHack 2024 (Infosys)

- **Honorable Mention:** Developed a data-driven strategy projected to generate **\$15M in regenerative economy** value and reduce environmental impact by **25%**.
- Collaborated with a cross-functional team to identify and cut transportation inefficiencies by **20%** using smart infrastructure data.

EDUCATION

Master of Data Science | Deakin University, Melbourne | *Expected 2026*

- **Academic Achievement: High Distinction (HD)** average across Machine Learning, Statistical Data Analysis, Data Wrangling, and Mathematics for AI.

B.Tech (Hons) Computer Science & Engineering | SASTRA University | *June 2024*

- **GPA:** 8.62/10. Strong foundation in Data Structures, Algorithms, and Software Engineering.
